Our specialty

❖ Communication systems:

- ✓ Radio-based **tactical communication** systems.
- ✓ **Digital communication** systems.
- ✓ **Cellular and IP based communication** systems.
- ✓ **MCPTT** compliant communication system.
- ✓ **Mediation and linkage** systems between PTT technologies.

❖ Rent and sell end equipment:

- ✓ **Dedicated / rugged end equipment for DMR** systems.
- ✓ **Dedicated / rugged end equipment for POC** systems.
- ✓ **Accessories** for equipment.
- ✓ **Service and repair lab.**
- ✓ Satellite devices and equipment.

❖ Service array:

- ✓ **Service laboratories nationwide** (in Israel).
- ✓ Repair of equipment and accessories (maybe at customer's site).
- ✓ **supervision and co-handling** of control systems and communication infrastructure.

❖ Infrastructure:

- ✓ **Network design, layout and coverage**
- ✓ **Construction of foundation for installation of antennas and masts**
- ✓ **Nationwide communications infrastructure**
- ✓ **Cellular: Private LTE network including 5G**
- ✓ **Cellular + Radio Testing Laboratories**
- ✓ **IoT + IoT connection** to system centers
- ✓ **Communication and control rooms**

❖ Dedicated software development:

- ✓ **Software development** for different markets
- ✓ **Development of interfaces and integration** of systems

❖ Cameras:

- ✓ Body cameras.
- ✓ **Smart cameras** with real-time transmission.
- ✓ Video analysis and facial recognition.

EasyTalk - PTT Over Cellular

- ✓ Fast connection - PTT on smart or ruggedized mobile devices.
- ✓ Emergency button - smart distress transmission to dispatch system.
- ✓ GIS system - Location apps.
- ✓ Transfer messages and files to a single subscriber or subscriber group.
- ✓ Operating and control station with advanced Dispatcher system capabilities
- ✓ National and global network coverage
- ✓ Linking capabilities between DMR systems and the easy talk system
- ✓ A wide range of devices including ruggedized devices, explosion-proof devices and related accessories.

Easy Talk service

- The service operates on the cellular / WiFi infrastructure and networks without the need to deploy antennas and relays.
- The service replaced HOT's old "Mirs" system.
- Notable features of the service and system:
 - ✓ National and global connection based Voice over IP (VoIP)
 - ✓ Private calls, emergency calls and several types of group calls
 - ✓ Support for very large call groups (hundreds and thousands of group members)

POC systems

PTT Communication - Push to Talk

- ✓ Create group or private conversations and communications.
- ✓ Full national and global coverage.
- ✓ Available on any device or operating system.
- ✓ Encrypted calls.
- ✓ Real-time communication over the cellular or WIFI network.
- ✓ Option to connect to a digital radio network.
- ✓ An effective solution at a convenient cost.

Location - Tracking and reporting location

- ✓ Built-in GPS transmitter
- ✓ Location detection by the call center.
- ✓ Quick supervision Tracking of individual track.
- ✓ View location history.
- ✓ Set up a quick call by pointing to a map location on the screen
- ✓ Control and monitoring of the organization's mobile workforce.

POC systems

Chat - Instant messaging:

- ✓ Secure corporate chat
- ✓ Communicate instant messages in real time with each member of the organization.
- ✓ Ability to send messages during voice calls.
- ✓ Delivery of messages is waiting for the recipient until delivery during login.
- ✓ Sending instant messages combined with voice communication makes the corporate communication experience more efficient.

SOS - Emergency signal

- ✓ Dedicated button for distress and emergency alerts on the device.
- ✓ In an emergency - a permanent and continuous connection for a quick response.
- ✓ In emergencies - prioritizing emergency communications over routine communications.
- ✓ In case of emergency - send the device positioning automatically for status and quick decisions.
- ✓ Eavesdropping listening - Ability to take control of the device remotely and open listening without the physical involvement of the alerting party.

Command & control systems

Smart command and control position - Dispatcher

- Communication management and labor control.
- Quick supervision and tracking of paths.
- View location history.
- Group call by marking a polygon area.
- Receive SOS distress alert.
- Remote audio channel opening.
- Branding and distinction subscribers and groups.
- Recording calls and information (data).

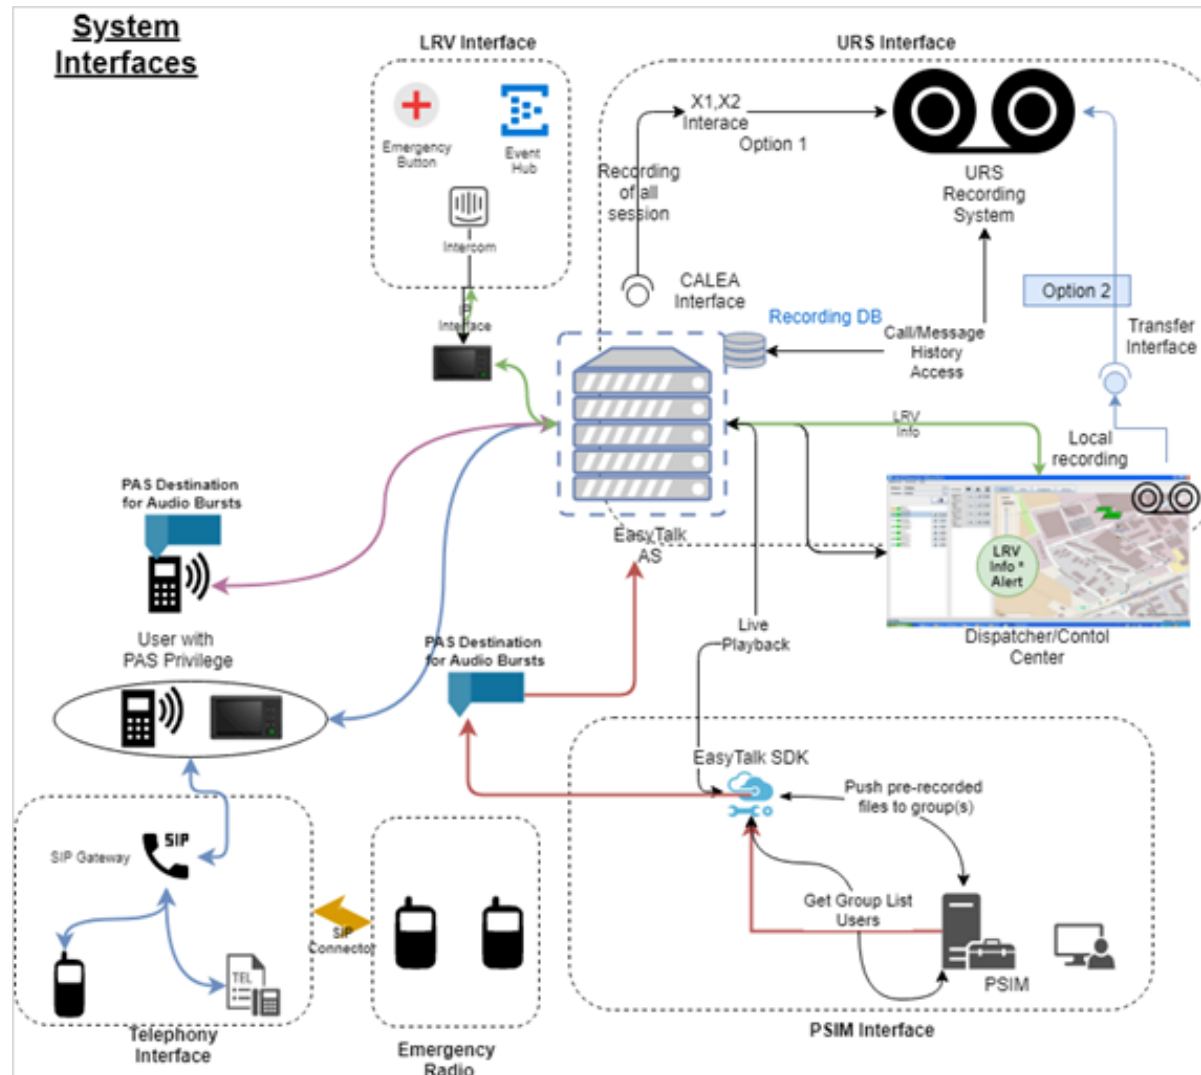

A variety of advanced end and mobile devices

- A wide range of devices based on open operating systems such as: Android, iOS and Windows.
- Hardened and explosion-proof devices that are extremely durable.
- Accessories of all types and for all types of devices and activities.

System architecture / interfaces

It's all about the people

It's all about the service

The values that lead us in providing customer service:

Reliability - We are committed to providing a professional, efficient, courteous and decent service. While providing a quick and available response according to the customer's needs.

Professionalism - We are committed to providing professional service by leading professionals in their field who will provide a high and efficient level of service, while constantly improving and striving for excellence.

responsibility - All our products are the result of careful design based on extensive technological knowledge and a high international standard and we are committed to the supply of original parts and spare parts and first-hand technical knowledge.
